

Technical Specifications	
Model	HZS180
Category	HZS concrete batching plant
Theoretical Productivity	180 m ³ /h
Mixer Model	JS3000
Mixer Type	twin-shaft
Discharge Height	4.2 m
Aggregate Bins	4 bins × 20 m ³ each
Total Power	~250 kW
Control System	Fully Automatic (PLC + PC + Remote Monitoring)

KEY FEATURES

- Largest stationary model delivering 180 m³/h for mega infrastructure projects
- JS3000 twin-shaft mixer with dual 37 kW motors (74 kW total) and 3.0 m³ dry capacity
- 4-bin aggregate system (20 m³ each) with 1200 mm belt conveyor
- Centralized PLC control with remote monitoring for maximum operational efficiency
- Designed for dam, bridge, port, airport, and continuous industrial concrete production

Certification	ISO 9001, CE Available
Warranty	Contact our sales team for details
